Equipment info: NADAC specific equipment

“The trial you are entering may use slatted contacts. For many years slats have NOT been used in NADAC trials. The reasons for this is that with the lowered height of the NADAC A-frame, and the advent of rubber coated equipment, NADAC found that slats became entirely useless in the sport. As the dogs had more than enough grip with the rubber coatings. NADAC was the first organization to use rubber contacts, and we feel that the removal of slats was the correct and logical next move. The reason we are allowing slats is to encourage new clubs to try NADAC, this way they do not have to purchase a specific set of equipment for NADAC. And to help struggling clubs who can’t afford the NADAC spec contacts. The new generation of slats are not a danger to dogs like the old generation was, so while they are not needed for dogs competing in NADAC, it won’t hurt to have them either. It should be noted that any Regional or Championship event that you attend with NADAC will be using non slatted contacts.”

If you are not coming to have fun with your dog, then this is not the trial for you. We are here to have fun and make it as great of an experience as we can. These trials are very laid back and take place in a relaxed atmosphere. No aggressive dogs or people are allowed!!

We will kinda run on some type of schedule. If the exhibitors come out and help set jump heights then the trials run quite efficiently. If no one helps, then as main workers get tired, the trial will run late and slow. We appreciate your help and thank you in advance.

Metro Sports Center offers a full concessions stand and **does not** allow food to be brought into the Center; only treats and water for your dog will be permitted.

Good luck to all of exhibitors!!!
